DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 39 is rejected under 35 U.S.C. 102(e) as being anticipated by Overstreet et al 5492186 (art of record).

Overstreet discloses a rock bit having at least one cutter cone mounted to the end of a body. The cone carries teeth with a plurality of inner row teeth and a plurality of gage row teeth. The teeth include a hardfacing 53 comprising steel and spherical cast carbide (see for example abstract). The carbide is about 70 per cent by weight and includes 100 per cent tungsten carbide (see col. 4, lines 13-18).

Response to Arguments

Applicant's arguments with respect to claim 39 have been considered but are moot in view of the new ground(s) of rejection.
